Burnt

HOW MANY TOKENS DID YOU BURN TODAY?

Every builder in SF is running Claude, GPT, and Gemini all day — but nobody sees the scoreboard. **Burnt is the daily leaderboard for AI usage.** Post a screenshot of your token count, build a streak, and find out who's really shipping.

1

Screenshot your usage

Grab your token count from Claude Code, Cursor, the API console — any AI tool you burn tokens in.

2

Post your burn

One post a day keeps your streak alive. Add the model and what you were building.

3

Out-burn your friends

Climb the daily leaderboard, invite friends, nudge them when they haven't posted, and rep your org.

Scan to join

Free. Takes 60 seconds to post your first burn.

No follower counts to grind, no algorithm — just you, your tokens, and the leaderboard.
