Burnt

HOW MANY TOKENS DID YOU BURN TODAY?

Every builder in SF is burning through Claude, GPT, and Gemini tokens all day, but nobody sees the scoreboard. **Burnt is the daily leaderboard for AI usage.**

Screenshot your token count from whatever tool you build with and post it. One post a day keeps your streak alive and moves you up the ranks. Invite your friends, nudge them when they haven't posted, and put your team on the board.

Free. Your first burn takes 60 seconds.

No followers to grind and no algorithm. Just you, your tokens, and the leaderboard.
